

Correct Door Installation

Wrong Door Installation

During the first few fires, a white film may develop on the glass front as part of the curing process. The glass should be cleaned or the film will bake on and become very difficult to remove. Use a non-abrasive cleaner and NEVER clean the glass while it is hot.

CAUTION: If the floor material extends above the bottom front edge of the fireplace, the bottom louvers may not open properly. Adjust the unit framing dimensions accordingly. The minimum floor clearance to combustibles must be maintained from the top of the carpeting, tile, etc.

Ensure that Door is correctly attached before lighting unit
