

GLEN DIMPLEX AUSTRALASIA LTD

Horizon top panel replacement

1. Lift the flue clear off the top panel
2. On the back edge of the top panel bump firmly towards the front of the fire. This will move the top panel forward and release it from the six retaining rivets, 2 in the top of each side panel, 2 in the top of the back panel. The top panel is retained by rivets in key hole slots.
3. Replacement is reverse of removal.
