

# OPERATION

DAC12005-2

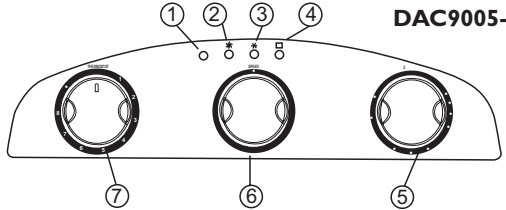

1. Power indicator
2. Fan operating indicator
3. Cooling operating indicator
4. FULL WATER indicator
5. Thermostat
6. Speed switch with options for - LOW FAN, HIGH FAN, LOW COOL, HIGH COOL.
7. Timer (1-8 hours) as well as ON/OFF switch

DAC9005-2

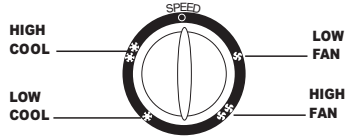

## Turning ON/OFF

- Set TIMER to ON for continuous operation (the unit will operate as long as it is not turned off). Power indicator comes on.
- To turn off the unit, turn the TIMER to OFF position.

## Set Timer

Set the TIMER to the desired operating time (1 to 8 hours). When the set time has been reached, the machine will shut off automatically.

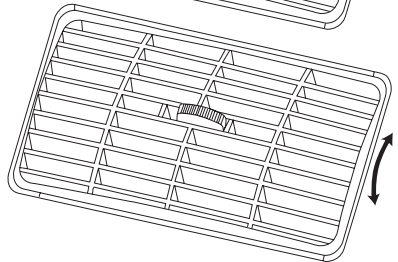

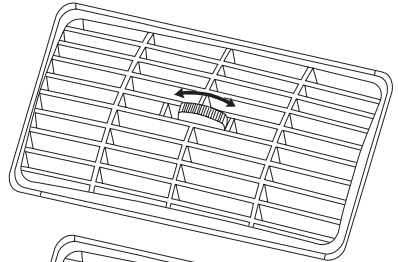

## Setting the Temperature

Turn the THERMOSTAT to regulate the temperature you desired. (This is for cooling mode only.)

## Regulating air flow direction

Turn the roller on air vent to control the air flow direction of the vertical louvers. (only DAC 9005-2)

Move the air vent directly to adjust the air flow direction of the horizontal louvers.

## NOTICE!

To prolong the compressor's life, the compressor will only work 3 minutes after you switch the unit on or re-switch on, The cooling system will switch off if the ambient temperature is lower than the set one. The ventilation however, keeps working on the set level. If the ambient temperature rises above the selected level, the cooling will return to work.
